MULTI-SENSORY THERAPY PROGRAM

Multi-sensory stimulation creates pleasant days. The environment provides soothing sounds and music, fascinating light displays, appealing aromas and contrasting textures, all designed to stimulate the primary senses and induce feelings of peace and relaxation.

BENEFITS OF MULTI-SENSORY THERAPY
• Stimulates senses
• Enhances self-esteem
• Improves self awareness
• Increases focus
• Encourages relaxation
• Improves task concentration
• Improves communication
• Encourages exploration
• Promotes interaction between the resident and caregiver
• Improves morale

We make a life by what we give.

ECTC has provided skilled care in a residential setting and educational programs since 1979.

We believe quality and excellence to be fundamental...and becoming a family makes us unique.

Exceptional-Care.org
At Exceptional Care & Training Center, we care for the whole person. Our residential, nursing, and day training services are supported by the same TEAM members to ensure continuity of care.

We maximize habilitation and enhance the quality of life of individuals in our care. Because residents have a wide range of conditions and needs such as intellectual disabilities, cerebral palsy, brain injury, and genetic abnormalities, we partner with the resident’s personal physician and therapists to develop an individualized care plan focusing on habilitation services, skilled nursing services, educational needs, nutritional needs, and socialization. We provide many on-site consultants and therapies.

Our residents enjoy regular outings to community events, parks, bowling alley, shopping centers, and much more. ECTC is able to provide wheelchair-accessible transportation and adaptive equipment to assist in participation in our community. There are also opportunities to relax in our beautiful courtyard with its serenity pond and garden and wheelchair-accessible swings and gliders.
