

# FRANKFORT

CARE AND REHABILITATION

## TESTIMONIAL

“This place is beautiful and these are all beautiful people. I can’t imagine where I would be if I hadn’t found this place. You know what I was like when I got here, I couldn’t even get out of the car. It took three of you to get me out. I could not control my arms or legs and I was dependent on you guys for everything. I am the example of what you are capable of. Those guys back in the gym are phenomenal! Everyone here treats you great! The food is awesome! Jeff, the man in charge, is really cool and is always checking in to make sure everything is okay. Now I am walking on my own, feeding myself, dressing myself, only thing I can’t do is tie my shoes! But, I’m confident that will come in time and hard work! So glad to be somewhat back to normal! Thank you Frankfort Care and Rehabilitation Center! I am forever grateful!”

## DARYL

Daryl Christy was admitted to our facility in April due to history of CVA. Mr. Christy was evaluated and received services for PT,OT, and ST.

Upon admission, three staff members were required to get him out of the car. When he first began therapy, he could not grasp objects with left hand and limited with right hand. He required maximum assist with dressing and grooming.

Mr. Christy has worked hard every day to improve in all areas to return to his prior level of function. Within one month, Daryl met his speech therapy goals returning to prior level of function. He is now independent with the exception of being able to tie his shoes. He was unable to walk or lift his legs when admitted in April, he is now walking independently without assistive devices on even and uneven surfaces, including stairs.
