

KIRTLAND

REHABILITATION AND CARE

PATIENT TESTIMONIAL

“What is like most about Kirtland is their physical therapy department. It is phenomenol, especially Greg and Tom. I have been given therapy 45 minutes for three days a week from my broken hip. In addition, the activity director truly cares and takes time with the patients to make sure they are enjoying themselves. They have music, art, various outdoor events, and much more. I strongly recommend!”

– Alicia Wills

ALICIA

Mrs. Wills came to Kirtland originally in August of 2021 suffering from sciatica, which is nerve pain. Her sciatica was in her back and created weakness in her ambulation. After extensive therapy from our team, Mrs. Wills was discharged home feeling strong and resilient.

Three months later, Mrs. Wills went to the hospital to have hip surgery. Because her past experience with Kirtland was excellent, she decided to return for additional care services. In this instance, Mrs. Wills was

weaker and needed additional assistance with bed mobility, walking, stairs, safety awareness, body mechanics, and endurance. Again, Mrs. Wills worked closely with the therapy department to regain her strength and ability to return to her place of residency.

Mrs. Wills discharged with another excellent experience and strongly encourages Kirtland Rehabilitation and Care to any person requiring therapy services.
