

LYNDON WOODS

CARE AND REHABILITATION

TESTIMONIAL

"When I first arrived here I was in a lot of pain. I didn't want to stay at first because I missed my family. A nurse consoled me and convinced me to stay to get better so I could return home. The people here are wonderful, when I attended rehab it was a true joy, because they were showing me how I could get better every day. I would say hello to everyone in the morning on my way to therapy because I love people and I enjoyed going. I wanted to show that the love that they have shown me was truly appreciated. I will miss everyone and I would definitely recommend people to come here to take rehab."

- Charlotte Logsdon

SHARLOTTE

Charlotte Logsdon admitted to Lyndon Woods after a hospitalization secondary to a Motor Vehicle Accident resulting in multiple injuries, including bilateral nasal bone fractures, bruising and lacerations.

Charlotte's goal was to get to go back home with her granddaughter. Prior to her hospitalization she was independent with all aspects of self care.

Therapy goals focused on strengthening,

walking, walking up and down steps, cooking and the ability to complete self care independently.

Therapies focused on walking, transfers, strengthening and self care. Charlotte was able to return home independent with all care and walking.
